

## Release Notes for 7.0.12783

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Configuration	Fix	Fixed an error when attempting to edit a marketing incentive profile that references a deleted coupon.	
SPOT	Coupons	Addition to Existing Feature	The subscription auto-renewal service will now support A/R as a payment option for renewal.	
SPOT	Credit Cards	Fix	The Credit Card Reconciliation screen was sometimes failing to get accurate data for a store other than the currently logged-in store.	
SPOT	Customer Connect	Removal	Removed items from Customer Connect settings that are no longer used: Credit Cards General > Data Formats Pickup > Disable Credit Card Validation	
SPOT	Email	Fix	Fixed @DELIVERYIMAGE in scheduled route delivery emails	
SPOT	Exports and Utilities	Addition to Existing Feature	A "BillingGroup" field has been added to customer (C) rows in Data Export Service A, containing the A/R billing group of the customer.	
SPOT	General	Addition to Existing Feature	A "Description" field has been added to subscription plan level configuration settings, to be used in surfacing subscription plan information in CustomerConnect and the MDC Mobile App.	
SPOT	General	Addition to Existing Feature	The little-used "DL" panel in the Visual Invoice and Customer Lookup screens will now show a green "SB" if the associated customer has one or more active subscriptions. Clicking on this panel will give the clerk additional information about the subscriptions.	
SPOT	General	New Feature	A "Customer Signup Attempts" report has been added to the Web Requests folder in Reports Gallery. This report shows all attempts to sign up as a customer via CustomerConnect or MDC Mobile apps.	
SPOT	Reports	Fix	Route Customers - Details Report now sorts by stop when using either Spot routes or Delcon routes.	
SPOT	Reports	Addition to Existing Feature	CHANGED - Added "Route Name" and "Stop Number" to excel export of Customer Visits report.	

SPOT	Reports	New Feature	The "SMS Conversations" reports has been renamed to "SMS Conversations (Legacy)". A new "SMS Conversations" report has been added to the Customer folder of Reports Gallery that reflects data in the most current tables used by the Notification Center.	
SPOT	Routes	Addition to Existing Feature	When Use Delivery Console is enabled, there is now a (Go to Delivery Console) entry in Delivery > Routes, so that you can jump to delivery console even if no routes are defined directly in SPOT.	Workstation > System Menu Settings > Use Delivery Console
SPOT	Routes	Fix	Route Dashboard Report fixed to now show start/stop and total mileage in columns previously blank	
Data Exports	General	Addition to Existing Feature	Payment information from transactions without a cash drawer session has been added to the Drawer Export service	
SPOT	Coupons	Addition to Existing Feature	The ability to cancel unused subscription plans via merchandise return has been added to SPOT.	
SPOT	Coupons	Addition to Existing Feature	A notification of subscription auto-renewal or failure to auto-renew has been added to the Change Accounts tab of the Notification Center.	
SPOT	HSL	Fix	Fixed scan of HSL with leading % in change id/key caused loss of HSL history and unable to lookup.	
SPOT	Localities	Addition to Existing Feature	<b><i>As a SPOT User in Trinidad and Tobago, I require a new SPOT locality to be created.</i></b> Trinidad and Tobago have been added as a locality in SPOT	
SPOT	Notification Center	Addition to Existing Feature	Added active orders flag to notification of change account in change details column.	
SPOT	Reports	New Feature	New reports added: Active Subscriptions, Subscriptions by Date. Both organized by Store, Subscription Plan, Subscription Level and sorted by start date. Both include customer, start date, last used date, expire date, auto renew, items allowed, used, remaining and % used.	
SPOT	Reports	Fix	"Coupons by Description - Visit" report was no longer listing multiple-use coupons.	
SPOT	Reports	Change	The "RouteTrac Summary" report is now only including information from actual stops recorded in RouteTrac, rather than including information from static stops not on the route manifest.	
SPOT Scheduler	General	Fix	"Order Ready" email/SMS notifications were sending over and over for localities in New Zealand	

API	General	Fix	Fixed - Normalize the time range for en route (same day) visit requests	
API	General	Fix	Fixed - SMS Pickup request more consistently evaluating the day's cutoff time	
API	General	Fix	Fixed - API saving correct customer tender type for CCOF customers	
API	General	Change	API - ClientAccountEvent to provide comment regarding who / what sent a visit request
