

Release Notes for 7.0.12972

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Reports	New Feature	New report A/R Customers with Expired/Declined CCOF run by store and bill group for date range.	
SPOT	Search	Fix	Invoice search using "Route/Hotel" button was not returning results for service plans	
SPOT	Merchandise	Change	Merchandise orders associated with subscription sales will now be saved with a department group of "Subscription Plans", so that they will be broken out separately from regular merchandise sales on various sales reports.	
SPOT	Reports	Addition to Existing Feature	Tender Analysis By Store and Tender Analysis By Clerk reports updated to break out CC totals into CC Swiped and CCOF totals, as well as add number of visits by tender type.	
SPOT	Reports	Addition to Existing Feature	Route Customers report and Route Customers report - Details added column for Route Type On-Demand (OD) or Static.	
Deployment\Subscription Renewal Service	General	Change	Merchandise orders created by the subscription auto-renewal service will now have a timestamp one hour after midnight instead of one hour before; this is so that SPOT credit card reports will match processor totals.	
Deployment\Subscription Renewal Service	General	Addition to Existing Feature	The subscription renewal service will now use cash credit as a tender to renew the subscription if it is available.	
Dashboard	General	Addition to Existing Feature	The "Coupon Summary - OTS" report has been added to SPOT Dashboard	
API	General	New Feature	Added SMS 'sign up' (or 'signup') function. If the customer sends to the SMS number 'sign up', they will receive back a link. This will be enabled by the presence of a document template named 'SignupSuccessSMS' (context 'SMS') with the desired response text and link.	
API	General	Fix	Fixed - Issue when loading "live view" pins for customers using Zubie
