

Release Notes for 7.0.13355

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Conveyor	Fix	Fixed a problem where resolving a voided order in Storage Recon fails.	
SPOT	Coupons	Change	Subscription coupons are now added to new invoices before other auto coupons. This will prevent "Do Not Combine" settings from excluding the subscription coupon.	
SPOT	General	Fix	Push Notification scheduled tasks now support all store-related template tokens (e.g. "@STOREADDRESS1", "@STORECONTACT", "@STOREEMAIL")	
SPOT	Reports	Change	The "RouteTrac Summary" report now shows the route end date in addition to the time, and the "No PU" and "No DO" headers have been changed to "# PU" and "# DO" for clarity and consistency.	
SPOT	Reports Queue	Fix	The "Last Run Time" column in the Scheduled Tasks screen was not reflecting the cleaner's time zone	
SPOT	General	Addition to Existing Feature	A "Content" column has been added to the Mobile Pickup Alert screen, which shows the content of the SMS received from the customer.	
SPOT	General	Change	Sales of subscription plans to route customers were showing up in Counter group of sales reports.	
SPOT	Pricing	Fix	Restoration items marked as non-salvageable were still being assessed special charges even when the item price was zeroed out	
SPOT	Reports	Change	The previous "Prod Mins" column in the "Daily Production - Commission" report now shows "Prod Hours" to be consistent with the average column.	
SPOT	Reports	Change	CHANGED - The Top 20% Customers by Sales report was, in rare circumstances, not properly displaying the customer's total sales.	
OTS	General	Addition to Existing Feature	@FIRSTVISIT has been added as a supported email token in SPOT
