

Build 7.0.1700 Release Notes / June 2013

App	Area	Type	Comments	Settings	Rights	Required Changes
SPOT	AR	New Feature	<p><i>As an owner, I would like to print an item tally report for all items contained in a statement</i></p> <p>A "Print Items" button has been added to the Statement View screen and to the Statements tab on the AR-CC tab of Customer View. This will print a report showing a list of items belonging to the invoices posted to the selected statement(s).</p>			
SPOT	Customer Connect	Fix	Encrypted passwords were getting lost when processing web requests from CustomerConnect.			
SPOT	General	Fix	Removed diagnostic message accidentally left in SPOT. The message would occur when refreshing the home page after another workstation changed settings.			
SPOT	General	Change	The Classic theme uses the default windows background color (to preserve compatibility for previous operating systems)			
SPOT	General	Fix	SPOT was generating an error if run in 800x600 screen resolution and the window was maximized.			
SPOT	General	Fix	A second close button was visible in the Scheduled Route Setup screen in Customer View, which caused a crash when pressed.			

SPOT	Gift Cards	Fix	Fixed issue where the gift card manager showed an invalid card when it wasn't.			
SPOT	Home Page	Change	<i>As a manager, I would like to see all my credit card batch and exceptions on a single alert</i> Consolidated the Pmt Exceptions and CC Exceptions into one alert. Selection will bring up a choice of which view to invoke. Also added a "CC Batch" alert on the bottom row of alerts.	Workstation Settings > System Menu Settings > Alert of CC Batch		
SPOT	Home Page	Addition to Existing Feature	"Hours Worked by Labor Category", "Hours Worked By Security Group", "New Customers", and "Inactive Customers" graphs have been added to the Home Page.			
SPOT	Home Page	Addition to Existing Feature	<i>As an owner, I would like new graphs added.</i> "Hours Worked by Labor Category", "Hours Worked By Security Group", "New Customers", and "Inactive Customers" graphs have been added to the Home Page.			
SPOT	Hotels	Fix	If "Hotel Discounts Calculated Post-Tax" setting was unchecked for a hotel division, the discount amount was still not included in the taxable amount.			
SPOT	Hotels	Fix	The Hotel Reconciliation screen was not displaying the correct list of orders to be reconciled.			
SPOT	Hotels	Fix	If a new department was added to a hotel Quick, the newly split invoice was not receiving the hotel discount.			
SPOT	Hotels	Fix	Hotel delivery manifest was not sorting in the configured order.			
SPOT	Localities	Addition to Existing	United Arab Emirates has been added as a locality in SPOT.			

		Feature				
SPOT	Markin	Addition to Existing Feature	<p><i>As a clerk, I would like to see the top 2 customer preferences on the batch mark-in screen</i></p> <p>Added top 2 customer preferences on the batch mark-in screen.</p>	<p>To enable this feature, check preferences in:</p> <p>Company Settings->Price Table->Department->Preferences To Print.</p> <p>While more than 2 preferences can be selected in this collection, only the top two are displayed. To change which preferences are printed, re-order the preferences collection and re-select them in the Preferences To Print setting.</p>		
SPOT	Pickup	Fix	Fixed payment column in pickup screen, it was cutting off some of the payment amount.			
SPOT	Printing	Fix	Resolved memory leak in invoice printing causing issues with print cache server, conveyor split monitor, and other high-traffic printing scenarios.			SPDocHandlers.dll available for patching.
SPOT	Rack	Change	<p><i>As a storage customer, I do not want to receive order ready emails for storage orders</i></p> <p>Email notifiers (Process Interceptor & the manual notification system) now will exclude orders scanned to storage</p>			
SPOT	Reports	Fix	A/R account balances were always showing as zero in Word merge report presentations.			
SPOT	Reports	Addition to Existing Feature	Reports Gallery > Customer > Customer Referrals - New report to display all customer referrals between a certain date range.			
SPOT	Reports	Change	Reports Gallery > Issues - All reports for Issue Manager have been updated to allow for reporting on issues created with a manual type.			

SPOT	Reports	Addition to Existing Feature	Reports Gallery > Credit Cards > Credit Card Log - New report to display credit card log entries for the selected store and date range.			
SPOT	Reports	Fix	Reports Gallery > Restoration > Non Restorable / Cleanable Items - Updated description to accurately describe which departments the report is looking for.			
SPOT	Routes	Addition to Existing Feature	SPOT external applications such as RouteTracMobile and 24-hour kiosks will now be able to sell out orders using the customer's existing cash credit.			
SPOT	Search	Change	"Late for Pickup" and "Overdue Orders" alerts and advanced searches have been modified to improve performance.			
SPOT	Setup	Addition to Existing Feature	<i>As a SPOT administrator I would like to conveniently select and create databases at server setup</i> Improved the user experience around running SPOT /setup for the first time. A convenient dialog is now shown which allows the user to locate an existing database or to create a new database. If any errors are encountered when creating a database the user is made aware. SPOT setup will not continue if there is an error.			
SPOT	SMS	New Feature	<i>As a customer, I would like to receive SMS/text messages.</i> Support for sending SMS messages and viewing replies. Customer View->Send Email/SMS F3 Menu->Email->Batch Email/SMS F3 Menu->Email->SMS View Replies	System Settings->Service Host Settings Company Settings->Service Host Settings Company Settings->SMS Settings->SMS Profiles Store Settings->SMS Settings-	Batch Email is also honored for Batch SMS.	A valid SPOT Service Host Account is required. Values in the Company->SMS->SMS Profile is provider-specific and is an internal SPOT process. SMS is an "opt-in" service

				>SMS Profile Company Settings->Customer Settings->Notification Settings. Make sure there is a "BatchSMS" Notification Type and at least one default method (preferably PhoneCell).		- "Default Yes" for the BatchSMS notification type is not available.
SPOT	Splitting	Fix	Attempting to manually split items from an invoice was causing a "type mismatch" error in SPOT in certain localities.			
SPOT	Splitting	Fix	When performing a split, SPOT will prompt to print the new order (if printing is enabled in workstation settings). However, if the user leaves the print order prompt on the screen this was blocking other invoices from saving as SPOT was still in a database transaction. This is no longer the case.			
Conveyor Kiosk	General	New Feature	<i>As a kiosk customer, I would like an email once my orders are ready for pickup</i> An "Order Ready Email" task type has been added to the Scheduled Tasks setup screen. This will enable the SPOT Scheduler to send order ready emails according to the defined scheduled task.			
Customer Connect	General	Addition to Existing Feature	CustomerConnect - Added check for existing pending web requests where there is a valid CCOF so the user can continue making a pickup request. Requires the configuration option that forces a CCOF prior to scheduling a pickup.			
Customer Connect	General	Change	CustomerConnect - Changed error text when a user does not have a valid CCOF when requiring one prior to being able to schedule a pickup.			
Mobile Client -	General	Fix	Fixed issue with Android mobile app where if the Route Enabled setting was set to "All			

Android			Customers" that it would treat the setting as Disabled and would not show the Route Pickup option on the main menu.			
Route Mobile Client	General	Fix	Prepaid orders sold through RouteTracMobile were creating an additional zero-amount A/R account posting.
