

## Release Notes for Version 7.0.5993

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Adjustments	Fix	Invoices auto-split at markin from an original un-split Quick were not applying the invoice mode adjustment across all orders.	
SPOT	Configuration	Fix	Changed the descriptions of "Print Register Receipt" and "Print Register Receipt - Threshold (CC)" settings to accurately explain their current functionality, which is the intended functionality. "Print Register Receipt" does not apply to card payments (credit, debit). "Print Register Receipt - Threshold (CC)" does apply to card payments.	Workstation Settings > Cashier Settings
SPOT	Configuration	Addition to Existing Feature	<b><i>As a SPOT user, I would like the 'Hide Item' option found in many configuration options to hide the corresponding item.</i></b> The "Hide" button in Program Configuration can now be used to hide individual Departments, Categories, Items, Modifiers, and Upcharges at detail, preventing them from being used. This functionality already exists for coupons.	
SPOT	Coupons	Fix	Fixed a problem that could cause an auto-coupon to be applied more than once per invoice.	
SPOT	Credit Cards	Change	<b><i>As a SPOT user, I would like the 1 cent token transactions to be reversed to avoid any fees.</i></b> TSYS - Terminal-based token requests will now VOID the AUTH before returning control to the user.	

SPOT	Credit Cards	Change	NZ- Reduced polling time for status requests from 5 seconds to 1.	
SPOT	General	Addition to Existing Feature	<b><i>As a CustomerConnect user in Germany, I would like Germany to be added to the list of countries available in CC</i></b> Germany has been added to the list of countries supported in CustomerConnect settings.	Company Settings > CustomerConnect Settings > CustomerConnect Profiles > (profile) > Settings >> General > Locality
SPOT	General	Fix	Changing an order between routes or route and counter from Order View will now leave an activity log entry.	
SPOT	General	Fix	Fixed a problem where SPOT could lock up when cancelling a Quick.	
SPOT	General	Fix	Fix a possible crash when using a manual adjustment with a lengthy name	
SPOT	General	Fix	Fixed a problem where the Employee Production report would not display if an HSL ID was changed during the date range selected.	
SPOT	General	Fix	Fixed a problem where an invoice would appear to have been voided but in fact had not.	
SPOT	General	Addition to Existing Feature	<b><i>As a pickup/dropoff Kiosk user I would like a report enhancement</i></b> Add time to Picked Up column on Kiosk - OrdersPicked Up report. This may be a few minutes later than when the garments are actually dispensed depending on the load on the kiosk server.	
SPOT	General	Fix	Fixed a problem with the price change alerts and searches that would cause some changes	

			to not be reported.	
SPOT	Item View	Fix	Fixed a problem that could cause an unintended alteration to be added to an order.	
SPOT	Mapping	Fix	Fixed issues with SPOTMap (Telogis) mapping Canadian addresses.	
SPOT	Markin	Fix	Should all invoice numbers available for the current month be exhausted SPOT will now give an explanatory error rather than locking up.	
SPOT	Markin	Fix	Fixed a scenario that could cause price later alterations to not prompt for a price when racked.	
SPOT	Markin	Fix	Fixed a problem that can cause one item in a detail session to unintentionally have a different promised date than the rest.	
SPOT	Markin	Fix	Fixed a problem where SPOT may unnecessarily prompt to remove a discount from an order.	
SPOT	Merchandise	Fix	Allowing the prompt to print a receipt to remain open after a merchandise sale no longer maintains an open database transaction.	
SPOT	Mobile	Addition to Existing Feature	The ability to link a referring customer to a new customer via the mobile referral code has been added to SPOT.	
SPOT	On-Screen Keyboard	Fix	Fixed bug that crashes SPOT if viewing a report while the on-screen keyboard is open.	
SPOT	Reports	Fix	FIXED - In some cases, the Daily Report was	

			improperly displaying write-off events in stores where the write-off event did not occur.	
SPOT	Reports	Fix	Fixed issue running Time Clock By Labor Category (Detail) and (Summary) presentations.	
SPOT	Reports	Addition to Existing Feature	Email address has been added to the "All Customers with Ratings" report.	
SPOT	Reports	Fix	Fixed error when running "Incoming Summary By Clerk (Hourly) - Combined" report	
SPOT	Reports	Fix	Fixed the Incoming Summary by Group report to work properly when multiple stores are selected.	
SPOT	Reports	Addition to Existing Feature	Customer billing group has been added to the list of report fields for statements and hotel statements. (Note: Billing group has NOT been added to the default statement and default hotel statement, but is now available to be used in custom statements).	
SPOT	Routes	Change	<p><b><i>As a SPOT user, I would like an option to prevent storage orders from showing up on a route manifest</i></b></p> <p>Routes that have a specific Rack Assignment for inclusion to the manifest will now use this assignment to override the "Storage" mode of an order, allowing orders to be delivered w/o changing the mode away from "Storage".</p>	

			"Storage" orders also will no longer show up in the Route Recon.	
SPOT	Routes	Addition to Existing Feature	<p><b><i>As a SPOT user, I would like the on-demand route scheduler cutoff time to have an optional override to impress customers</i></b></p> <p>It is now possible to override the OnDemand Scheduler Same Day Cutoff setting if the user has the Override On-Demand Cutoff Time activity right. If the user does not have this right, a PIN prompt will appear to give a chance for a user that does (such as a manager) to authorize the visit.</p>	
SPOT	Routes	New Feature	<p><b><i>As a SPOT Route user, I would like the On Demand Scheduler to send a confirmation email</i></b></p> <p>SPOT can now be configured to send emails to the customer when the Route On Demand Scheduler is used.</p>	<p>Store Settings &gt; Route Settings &gt; On-Demand Scheduler Emails Store Settings &gt; Email Settings &gt; Route On-Demand</p> <p>Standard customer email tokens are available, plus the following: @STARTDATE - Starting date of the request @ENDDATE - End date of the request @ONDEMANDTYPE - The type of request: Pickup, Delivery, Pickup/Delivery, Cancellation</p>
SPOT	Search	Fix	Fixed problem where customer ratings colors were overriding route and VIP colors	
SPOT	SMS	Change	Add Country Code to Twilio SMS messages	

			(appears to now be a requirement).	
SPOT	SMS	Change	The SMS Replies alert will no longer show replies from disabled customers by default. A "Show Disabled Customers" button has been added to show them when desired.	
SPOT	SMS	Fix	Corrected the description of the SMS replies alert to correctly indicate that it displays the last 250 SMS replies.	
Conveyor Client	General	Fix	Fixed a problem where records can be sent to a conveyor in the wrong order when a user very rapidly splits an order after detail.	
Conveyor Kiosk	General	New Feature	<b><i>As SPOT Support I need to be able to customize the messages of SPOT.Kiosk without breaking future updates</i></b> Added custom message support to SPOT.Kiosk	
CustomerConnect	General	Fix	Fixed error when attempting to process a payment web request for a customer that has credit card payment disabled. SPOT will now warn of the problem instead of attempting to proceed and causing an error.	
CustomerConnect	General	Addition to Existing Feature	<b><i>As a Customer Connect user, I would like customer specific referral and promo code fields to be available in the sign-up and customer information.</i></b> Added promo code and referral sources to CustomerConnect signup. Referral sources require the "Display on Web" setting which is turned on by default. Description will override the name of the referral source when displayed on the page.	

CustomerConnect	General	New Feature	<b><i>As a Customer Connect user, I would like to check up to 50 gift card balances without user authentication</i></b> Add anonymous gift card balance check block on login page	
OTS	General	New Feature	Added Print Tracking Widget
