

## Release Notes for Version 7.0.6598

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Configuration	Addition to Existing Feature	<p><b>As a SPOT user, I would like to customize the names, descriptions, and if they 'Display on Web' for notification types</b></p> <p>The ability to edit the description of customer notification types has been added to SPOT. Also, a "Display on Web" setting has been added to the notification types, so that they can be filtered by CustomerConnect.</p>	Company Settings > Customer Settings > Notification Settings > Notification Types > (Edit) > Description Company Settings > Customer Settings > Notification Settings > Notification Types > (Edit) > Display on Web
SPOT	Configuration	Change	Fixed - If a price table was removed, and another renamed to the just-removed name, SPOT would lock up when attempting to save.	
SPOT	Coupons	Addition to Existing Feature	<p><b>As a SPOT user, I would like the referral program to have options to apply awards that will automatically be used in the next mark-in</b></p> <p>The ability for referral award coupons to automatically be applied on the next customer visit has been added to SPOT. Also, the ability to prompt the user that an award coupon has been applied has been added to SPOT.</p>	Store Settings > Customer Settings > Customer Referral Settings > Notify User When Award Applied
SPOT	Credit Cards	Fix	Fixed issue with token CCOF submit for auth, and the exp dates. Because a tokenized entry may be updated at the processor with new data, they expire differently from a normal card entry. Therefore, SPOT will manufacture a "valid" exp date if the current on-file date is expired. The issue was that SPOT manufactured this new date regardless of whether or not the existing entry was valid. This has caused some unnecessary declines.	
SPOT	Credit Cards	Fix	Fixed - Existing CCOF entries were not consistently updating if updated from the customer view.	
SPOT	Customer View	Fix	Fixed a loophole that allowed adding A/R to a customer without selecting a billing group.	
SPOT	Email	Change	In emails or SMS messages, @CLERK will now be replaced with the clerk's first name. The clerk's full name is available from @CLERKFULLNAME	
SPOT	Email	Fix	The @LOCKERINVOICES email token was not working if invoices were scanned in SPOT.Locker for customers who were not set as Locker in Customer View.	
SPOT	General	Fix	Fixed problem where the Customers by Referral Source report does not run if the referral source has an apostrophe in the name.	
SPOT	General	Fix	Fix a problem where most of customer view was not visible after displaying A/R Activity Report	

SPOT	General	Fix	Fixed tabbing order in A/R-CC tab of Customer View.	
SPOT	General	Change	Cosmetic improvements to Help > About.	
SPOT	General	Fix	Routes - Export to GPS will no longer create multiple waypoints for the same lat/lon when the route has multiple customers on a stop.	
SPOT	General	Fix	Fixed a problem that could display incorrect coupon amounts on the visual invoice.	
SPOT	General	Addition to Existing Feature	<b>As a SPOT Hotel user I would like to use per-hotel custom statements</b> Individual hotels can now have their own custom statement files, overriding the custom statement file specified for the store.	Store Settings > Hotel Settings > [Hotel Name] > Custom Hotel Statement File.
SPOT	General	Change	Added -SPOT Location > Store - Store hours entry field replaced with button - selection will invoke new dialog with old "formatted" store hours and a new "table" store hours. Both should be consistent, but the "table" version will allow other processes and applications know what the day-to-day hours are.	
SPOT	Home Page	New Feature	<b>As a SPOT user, I would like several enhancements to the Notification Center</b> A workstation setting has been added to govern the scope of the Notification Center; also, security rights to view notifications, for the current store only or all stores. If a user has the All Stores right, they can switch between stores in the NC.	Workstation Settings > System Menu Settings > Notification Center Scope
SPOT	Markin	Addition to Existing Feature	<b>As a SPOT user, I would like to apply fees from mobile pickup requests.</b> SPOT will now automatically apply fees/surcharges from mobile pickup requests.	
SPOT	Markin	Fix	Disabling "Print Visit" in customer view will now correctly disable both detail and quick visits for that customer.	
SPOT	Messaging	Fix	Fix problem with sending a SPOT Message to a large group of stores.	
SPOT	Messaging	New Feature	<b>As a SPOT user, I would like to see SPOT messenger messages received from Customer Connect as a conversation thread.</b> A Messages tab has been added to Customer View with a "conversation thread" view of emails and SMS sent/received	
SPOT	Mobile	Fix	Attempting to create a "Push Notifications"-type scheduled task results in a run-time error	
SPOT	Other	Fix	Fixed display of serial port information in Help > About	

SPOT	Pricing	Change	<b><i>As a SPOT User I want support for invoice modes &gt; 20 characters</i></b> Changed the length of invoice mode names from 20 to 40 characters.	
SPOT	Printing	Fix	Report-based invoice layouts were not including post-tax invoice adjustments	
SPOT	Quick	Fix	Quick now honors Workstation>Mark-in Settings>Retain Invoice Mode on Manual Split	
SPOT	Reports	Fix	Fixed a problem that could cause divide by zero errors when running the Activity Production report	
SPOT	Reports	Fix	Fixed formatting of RouteTrac Summary report.	
SPOT	Reports	Fix	Fixed store selection for Tax Collected By Tax Entity report.	
SPOT	Reports	Fix	AR Account Numbers greater than 15 characters will no longer cause problems with the Customer Initial Activity report.	
SPOT	Reports	Fix	Fixed a display problem in various timeclock reports that could report regular (non-overtime) hours in excess of the maximum possible in one of the subtotal fields. This was an issue with the formulas used to format the data for display, not with the underlying time accounting.	
SPOT	Reports	Fix	Pricing > Merchandise Items report will no longer display deleted items.	
SPOT	Reports	Addition to Existing Feature	<b><i>As a SPOT user I want a PNP report that lists the PNP reason</i></b> Added PNP Orders (Reasons) report, which is PNP Orders with email address replaced with the PNP Reason	
SPOT	Reports	Addition to Existing Feature	<b><i>As a SPOT Restoration user I would like the restoration report headers to indicate the selected Salvageability option</i></b> Restoration reports will now indicate what items were included (All Items, Salvageable items, or Non-Salvageable items).	
SPOT	Reports	Addition to Existing Feature	<b><i>As a SPOT user I would like a report listing customers that have opted in for SMS</i></b> Added a report listing customers that are opted-in for SMS: Reports Gallery > Customers > SMS Enabled Customers.	
SPOT	Reports	Fix	Fix Credit Card Transactions report to support longer transaction numbers.	
SPOT	Rewards	Fix	Fixed a problem where Monthly Rewards were incorrectly awarded by separating them internally from Marketing Incentives rewards. A new report to track Monthly Rewards is	This change does not affect coupons that are already issued.

			now in Reports Gallery > Adjustments > Coupons from Monthly Rewards	
SPOT	Routes	Change	Added setting for Route/Locker orders to determine when the locker assignment is made - at detail or at delivery.	Store Settings -> Route Settings -> Route Orders - Locker Assignment (At Detail/At Delivery). Note - "At Delivery" is for those using RouteTrac app only.
SPOT	Routes	Fix	Fixed - Removing multiple stops in one step no longer results in duplicated stop numbers.	
SPOT	Search	Addition to Existing Feature	<b>As a SPOT User I would like a Voids by Date advanced search</b> Added Voids by Date and Voids by Date All advanced search types.	
SPOT	SMS	Addition to Existing Feature	<b>As a SPOT user with lockers, I would like the list of ready orders in lockers to be sent via SMS to customers</b> Support for a @LOCKERINVOICES token has been added to the "Order Ready SMS" scheduled task type	
SPOT	SMS	Fix	SMS messages were broken for some customers since the 7.0.6359 update	
SPOT	SMS	Fix	The SMS profile name wasn't saving properly for Order Ready SMS scheduled task types.	
SPOT	Tags	Fix	Fixed a very unusual scenario where attempting to print tags could cause SPOT to hang.	
SPOT	Uncategorized	Fix	Fixed a scenario that would cause more than one invoice to be created from a single direct receive.	
SPOT	General	New Feature	<b>As a SPOT User I want a high contrast option for searches</b> Added a setting to override the selection color in customer and invoice search results.	Store > Search/Lookup Settings > Override Selection Color; Store > Search/Lookup Settings > Selection Background Color
SPOT	General	Fix	Fixed the <b>**Totals**</b> row of Production Commitment so that it doesn't skip the first day.	
SPOT	Home Page	New Feature	<b>As a SPOT user, I would like a new alert that is similar to web requests, that would provide information on new signups, account changes, etc</b> A "Web/Mobile Signups" alert has been added to SPOT, with a corresponding screen to review and acknowledge customers recently signed up via CustomerConnect or mobile app.	
SPOT	Home Page	Fix	The "Discard Request" button was not working for payment requests in the Notification Center.	
SPOT	Production	Fix	Disabled clicking on the <b>**Totals**</b> row of Production Commitment. It was never intended that this row have any function when clicked.	

SPOT	Reports	Addition to Existing Feature	<b><i>As a SPOT User I want the Route Customers report to have the Email Address available</i></b> The Route Customers report now includes the primary email address.
SPOT	Search	Fix	Fixed error when trying to use Batch Operations -> Batch Email from the Workflow graph search results on the SPOT Home Page.
SPOT	SMS	Fix	Fixed a problem with the SMS replies alert with non-US date formats.
SPOT	SMS	Fix	Fixed a problem where an SMS reply with an empty message body would not appear in SMS replies, but did affect the alert count.
CustomerConnect	General	Fix	Notification types marked as "Hidden" in SPOT configuration were still coming through to CustomerConnect
Dashboard	General	Fix	Dashboard Alerts widget will now show correct values for store specific alerts.
Mobile\MDC Mobile Client	General	Fix	Mapping store addresses with city names containing a space was causing SPOT Mobile App to crash.
Mobile\MDC Mobile Client	General	Change	Fix credit card validation on profile screen
Mobile\MDC Mobile Client	General	Change	Add 'Birthday' field on signup
Mobile\MDC Mobile Client	General	Change	Allow locality-specific Postal Codes (use PostalCodeMask as "### ##")
Mobile\MDC Mobile Client	General	Fix	Fix profile saving (no changes not send update)
Mobile\MDC Mobile Client	General	Fix	Fix to navigate any direction on map (stores screen)
Mobile\MDC Mobile Client	General	Fix	Disable 'On My Way' if menu option is disabled
Mobile\MDC Mobile Client	General	Fix	Change confirm page address title to 'Address' when you have selected retail service. Hide Notes/Gate code/Special Instructions for a retail customer.
Mobile\MDC Mobile Client	General	Fix	Update the pricing screen to use consistent decimals
Mobile\MDC Mobile Client	General	New Feature	Implementing a new logic for store hours operation
Mobile\MDC Mobile Client	General	Change	Add support for states/province validation

Mobile\MDC Mobile Client\My Orders	General	Fix	Set 'Ready Orders' as default page on 'My Orders' screen	
OTS	General	Fix	Fixed a problem with some OTS campaigns where route customers that have a home store other than the route store were excluded.	
ProductionTrac PC	General	Change	<b>As a ProductionTrac PC user, I would like additional and color coded info intended for a staging screen</b> ProductionTrac PC - Added "Show Tag Summary", by service. When enabled, shows a view directly below the scan field showing due day/date, lot #, and delivery/rush status. Intended for staging of garments as they prior to finish work.	PTPC Settings, Operation, toggles to enable / disable "Show Tag Summary" by service (production tool, item process, order process)
Reports Queue	General	Fix	Order Ready SMS messages for locker orders were not being sent from SPOT Scheduler Service	
RouteTrac	General	Fix	Use delivery address if present	
RouteTrac	General	Addition to Existing Feature	Add 'Show Active Sessions' option on manifest screen	
RouteTrac	General	Change	<b>As a RouteTrac Mobile user, I would like to scan a single invoice to deliver all customer's orders</b> Model "RouteManifestCustomer", "ManifestCustomer3" - new property, "ScanAtDelivery" ("NS" - No Scan, "OS" - Optional Scan/Single Order (all orders for customer are processed in like manner with one valid order scan), "OA" - Optional Scan/All Orders, "RS" - Required Scan/Single Order, "RA" - Required Scan/All Orders) Model "Route" - new property "DefaultScanAtDelivery" (same values as ScanAtDelivery) Model "SPOTCustomer" - new property "ScanAtDelivery" (same values as ScanAtDelivery + "--" (default) to cause the customer/stop to use the route's default setting)  "--" --> "Use Route Setting" (default for new customer or existing with non-set option) "NS" --> "No Scan" "OS" --> "Optional - Single Order" "OA" --> "Optional - All Orders" "RS" --> "Required - Single Order" "RA" --> "Required - All Orders"  Note that ALL customers grouped in a given route stop must have (will have?) the same setting for this, else the RouteStop will persist with the ScanAtDelivery of last customer.  If you wish to use a default or existing ScanAtDelivery, omit the field from the save request, and the system will	

			retain what's already there.	
RouteTrac	General	Addition to Existing Feature	Add piece count to manifest driver view	
RouteTrac\RouteTrac Client	General	Fix	Fix final item showing 0 of 2	
RouteTrac\RouteTrac Client	General	Fix	Adjust columns to fit data on Load screen	
RouteTrac\RouteTrac Client	General	Addition to Existing Feature	iOS - Implement enhance scanner usability Update ZXing.Net.Mobile from 2.2.0 to 2.2.9.	
RouteTrac\RouteTrac Client	General	New Feature	Add functionality to edit stop	
RouteTrac\RouteTrac Client	General	New Feature	Add prompt for locker attributes	
RouteTrac\RouteTrac Client	General	Fix	Remove 'Business Day' constraint.	
RouteTrac\RouteTrac Client	General	Change	Message screen enhancements	
RouteTrac\RouteTrac Client	General	New Feature	Add prompt for reason for non-scan Add screen to accommodate the OS and RS single order scan options	
RouteTrac\RouteTrac Client	General	Fix	Allow light to remain toggled on until scanning is complete	
RouteTrac\RouteTrac Client	General	Addition to Existing Feature	The "ScanAtDelivery" option must be set to "OS" or "RS" - all orders for customer are processed in like manner with one valid order scan	
RouteTrac\RouteTrac Client	General	Addition to Existing Feature	Add easy 'No Bags' button for route stop	
SPOT API	General	Addition to Existing Feature	Additional fields are now being checked for the description that shows in the Account Changes tab of the Notification Center: birthday, cleaning instructions, locker PIN, contact name, phone type, and credit card info. Also, the description now says "One or more secondary field changes" if the change is not one of the explicitly evaluated fields.
