Release Notes for Version 7.0.9095

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Assisted Assembly	Fix	Fixed Assembly|UserInitials and Assembly|WorkstationName invoice template nodes when printing at Assisted Assembly.	
SPOT	Conveyor	Fix	Fixed Assemble to Special Arm flag on upcharges from referenced upcharge tables.	
SPOT	Credit Cards	Fix	Retrieving a token using a Clearent terminal will now compare the card type to the list of allowed card types in the profile and reject if it is not on the list.	Company > Credit Card Settings > Credit Card Profiles > [Profile Name] > Credit Card Types Allowed
SPOT	Credit Cards	Fix	Ocius CC (UK) - Remove all unnecessary file activity (exists, rename, unlink)	
SPOT	Credit Cards	New Feature	***As a SPOT user, I would like a feature that updates CCOF tokens to Clearent*** Added Clearent Token Manager (Menu > Credit/Debit/Gift Cards >Manage Clearent Tokens). This view updates existing Clearent tokens to a new token when available, and also updates legacy processor tokens to Clearent tokens. (The legacy processor tokens must be exported from the legacy processor first according to existing procedures). Note that this view may take a long time to complete once started. It is recommended to choose only one store at a time.	
SPOT	General	Fix	Fixed an error when attempting to create and print a HSL from Item View	
SPOT	General	Addition to Existing Feature	***As a SPOT User, I would like field headers exported to be consistent with imported headers*** Added aliases for a number of existing columns in customer import for better compatibility with customer export NODENUMBER = STORENUM CUSTOMERGUID = CUSTUNIQUEID ZIP = POSTALCODE PHONE = PHONE1 PHONETYPE = PHONE1TYPE CREATEDDATE = SIGNUPDATE = SIGNUP REFERRALSOURCE = REFERRAL AR_ACCNUM = ARACCTNUM CREDITLIMIT = ARLIMIT VIP = VIPFLAG ACTIVE = CUSTENABLEDFLAG ROUTEINSTRUCTIONS = DELIVERYINSTRUCTIONS	

SPOT	HSL	Addition to Existing Feature	**As a SPOT user I want signed disclaimers to be tracked by HSL and not printed on future mark-ins** Added a new selection to Store Settings > Site Defaults > Save ItemTracking Details: "Signed Disclaimers". If set, HSL items will remember if an item disclaimer was signed (that is, if the clerk selects "Yes" to the "Did the customer sign the disclaimer" prompt at detail) and not reprint the disclaimer again for that HSL.	Store Settings > Site Defaults > Save ItemTracking Details > Signed Disclaimers
SPOT	Mapping	Fix	Fixed - single-stop manifests will now generate driving instructions	
SPOT	Markin	Addition to Existing Feature	**As a SPOT user, I would like the Customer Information Slip to pop-up at drop-off instead of pickup** Added a setting to print periodic customer info slip at detail, dropoff, or both	Store > Customer Settings > Print Periodic Info Slip At
SPOT	Messaging	Fix	Fixed a possible error when attempting to reply to a SPOT Message.	
SPOT	Quick	Fix	Fixed HSL Department Remap when Prompt for HSL Immediately is enabled.	
SPOT	Reports	Addition to Existing Feature	**As a SPOT user, I would like credit card transaction voids to be reported in SPOT** Menu > Credit/Debit/Gift Cards > CC - Void now warns when used that it voids only the credit card transaction and does not update any data in SPOT.	
SPOT	Reports	New Feature	**As a Compass user converting to SPOT, I would like a "Sales By Service" report** A "Period Sales By Service By Department" report has been added to the Sales folder of Reports Gallery	
SPOT	Reports	Addition to Existing Feature	**As a SPOT user, I would like a "Last Visit Date" column added to the "Coupons By Customer (Select List)" report** Added the customer's last visit date to the Coupons By Customer (Select List) report.	
SPOT	Rewards	Fix	Fixed a situation where older customer rewards assignments didn't generate rewards.	
SPOT	Routes	Fix	External service plans (which belong to new route functionality) were showing up in lists of routes on the Delivery tab, route assignment screen in Customer View, and the Insert Stop screen.	
SPOT	SMS	Fix	Fixed a problem that caused every non US phone number to be marked as not mobile in SMS- Validate Phone Numbers. Please note this is unrelated to and does not fix the issue for Canadian numbers described here: https://support.twilio.com/hc/en-us/articles/360004563433-Twilio-Lookups-API-is-Not-Returning-Carrier-Data-for-Canadian-Phone-Numbers	
SPOT	Tags	Addition to Existing Feature	**As a SPOT user, I would like a tag token that allows me to use a custom hotel acronym or abbreviation** Hotels now have a Tag Abbreviation setting. The abbreviation will	Store > Hotel Settings > Hotels > [Hotel Name] > Tag Abbreviation

			print instead of the hotel name when the @HOTELNAME tag template is used. If the abbreviation is blank (as by default) the full hotel name will print.	
SPOT	Utilities	Change	Menu > Order Management > Lockers - Assign/Clear: Renamed "Clear Assignments" to "Clear Assignments and Close Orders", and added "Clear Assignments Without Closing Orders" button	
Conveyor Client	General	Addition to Existing Feature	***As an ADAC user I want to use slot occupancy based splitting*** Modified SBS Conveyor Client to pass bulkiness (Slot Occupancy) to ADAC conveyors	
SOS	General	Fix	***As SPOT we need to update SOS to use the Microsoft Graph API*** Updated SPOT Offline Services to use the Microsoft Graph API for accessing OneDrive.
